## SUMMARY

I'm a software engineer who builds full-stack websites — both front-end and back-end. I work with HTML, CSS, JavaScript, SQL, and modern tools. I also have experience in software testing and mobile app development using Kotlin and XML. I've completed 20+ different projects, including e-commerce sites and 3D games. I enjoy solving problems and making sure everything runs smoothly and looks good for users.

## SKILLS

### Full Stack Web Development

- HTML / CSS / JavaScript
- SQL / Database Management
- Backend Development (Node.js)
- Frontend (React, Vanilla JS)
- Mobile App Development (Kotlin, XML)
- Software Quality Assurance (TestNG, Selenium)
- Git & Version Control
- UI/UX Design (Figma)
- Time Management
- Time Team Management

## EDUCATION

### City University of Science and Information Technology

Bachelor of Computer Science  
(2022 - 2026)

## WORK EXPERIENCE

### Web Developer Intern

- Devspire (Feb 2025 - May 2025)
- Developed responsive and dynamic websites using modern web technologies.
- Collaborated on full-stack solutions and optimized website performance.
- Performed QA testing using Selenium and TestNG.
- Worked with databases for backend functionality.

### Project Experience

#### Personal Projects (20+ Completed)

- Banking Web App – Secure and user-friendly interface.
- E-commerce Platform – Shopping system with payment integration.
- AI Chatbot – Interactive support bot simulation.
- 3D Endless Car Game – Built with Three.js for a realistic experience.
- University Website – Multi-page site with student/staff features.
- Movie Web App – API-driven movie search and display.
- Gym Website – Animated landing page with responsive layout.
- And many more: blogs, dashboards, portfolios, etc
